

SMART-O[®]

THE INTELLIGENT DRAIN PLUG

High-tech O-ring automatically expands when in contact with oil:

- Anti-leak and anti-vibration function
- High performance sealing
- Engine and oil pan protection
- Prevents oil loss and environmental pollution
- US originated technology
- Internationally patented innovation

Protection + Performance

SMART-OTM
WIPER BLADE REFILLS

SMART-O Swiss-engineered, high-quality wiper blade refills repeatedly outperform renown OEM brands in the market; longer product life, less parts to handle, more cost-effective, more road safety and added environmental protection!

SMART-O advantages:

Graphite inside wiper material – remains on surface for lubrication and friction reduction

Extreme weather and temperature resistant +123°C → -65°C (+253°F → -85°F), acid rain + UV resistant

Durability and noise-reduction: material maintains advantageous properties throughout product life

Reduced inventory: only 6 SMART-O wiper refills fit all vehicles, including cars, trucks, buses and heavy equipment

Quick and easy: NO need to search and match up various long OE part numbers, easy to change and fit to any wiper blade

Cost-saving: less replacement required, less cost of changing only refill vs entire wiper blade with frame

Eco-friendly: re-use wiper blade frames, less changing, produce less waste

Easy and smart replacement

1 Remove plastic end and old rubber refill from frame.

2 Slide fitting tool through metal claws.

3 Slide in new rubber refill.

4 Cut off excessive length to get an exact fit for any wiper blade. Done - go!
